

Story of Jit & Argha

Jit Ghosh is a hearing impaired child. When he was 5 years old, he was identified at a screening camp in 2009. As per audiological evaluation by the audiologist, it was detected that he has profound degree of sensorineural hearing loss.

After parental counselling, his parents decided to admit him in primary school. He has been reading in Class-III of Kodaliya GSFP School under Panihati Circle.

When he was identified as a child with special need (CWSN), his receptive & expressive skill was poor. Later he has been provided with hearing aid out of the fund from Sarva Siksha Mission.

Now he is very regular at normal school as well as resource room. By regular training his communication & language skill has developed. Every year he is getting books & stationary grant, escort allowance, travelling allowance for attending the resource room twice a week (Monday & Wednesday). It may also be mentioned that training programme for his parents are being arranged in regular interval so that they can nurture Jit at home in a proper manner .

Argha Chatterjee is a child with multiple disabilities. When he was 6 years old, he

was identified at a screening camp in the year 2009. As per evaluation by the psychologist, it was detected that he has mental retardation along with low vision.

After parental counselling, his parents decided to admit him in primary school. He is now reading in Class-III of

Anandamath Sishu Vidyalaya under Ichapur Circle.

When he was identified as a CWSN, he had various problems. He needed help for his daily activities like feeding, wearing dresses etc.

Later by regular training, he can now read & write well. He can take food independently and can communicate with Special Educators & his friends at school & resource room also.

However, at the Circle-level low vision examination camp in 2012-2013, the doctors' team of Susrut Eye Foundation & Research Centre identified that for better vision of Argha, cataract operation is needed. Later he was admitted for operation at Susrut on 17.06.2013. Now he is quite fit to lead normal life & also under

regular supervision of the team of doctors of Susrut Eye Foundation & Research Centre.
